

# Installation Sheet

## Model: Designer 703 Air Gap Faucet

### ⚠ WARNING

Please read carefully before proceeding with installation. Your failure to follow any attached instructions or operating parameters may lead to the product's failure.

Keep this Manual for future reference.

### ⚠ CAUTION

Discard small parts remaining after the installation.

### NOTICE

Failure to install the system correctly voids the warranty.

Handle all components of the system with care. Do not drop, drag or turn components upside down.

Be sure the floor under the water filter system is clean, level and strong enough to support the unit.

### Faucet Installation

**NOTE:** A 1.25" mounting hole is required for faucet installation

**Step 1** - Feed both the red and black tubing through the pre-drilled hole in the sink/counter until faucet is seated

**Step 2** - Under the sink, slide the following parts onto the threaded stem bolt in the order listed:

- Slotted Washer (Item B)
- Plastic Spacer (Item C)
- Lock Washer (Item D)
- Locking Nut (Item E)

**Step 3** - Tighten the Locking Nut onto stem bolt with wrench

**Step 4** - Locate the blue 1/4" tube included with the faucet or the existing tube from your water filtering system. Place the compression nut (Item H) on to the blue tube first, then slide the sleeve (Item G) and then insert the plastic insert (Item F) as shown in the figure to the right.

**Step 5** - Insert the blue tube into the end of the threaded stem bolt and use a wrench to tighten the compression nut securely

**Step 6** - Secure the Airgap Inlet (1/4" red tube) to the Brine/Wastewater connection on your reverse osmosism system

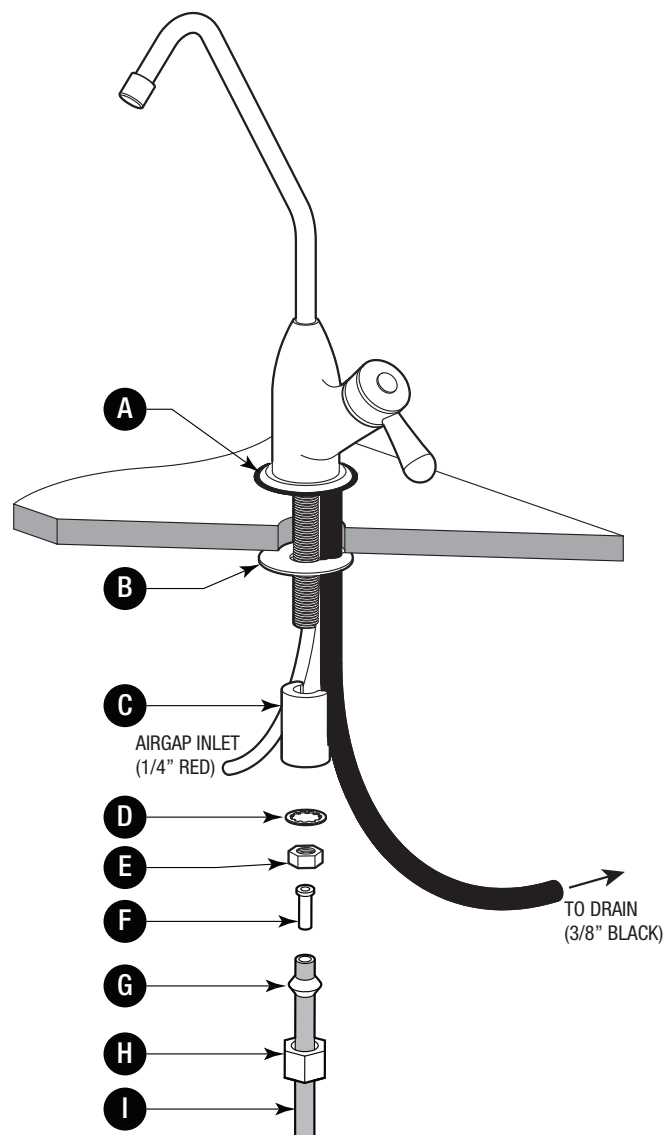

**Step 7** - Secure the Drain tube (3/8" black tube) to the drain saddle (sold separately)

### NOTICE

The 3/8" black tube must be as **SHORT** and **STRAIGHT** as possible. Make sure there is a downward slope with no low spots between this line and the drain. Leaving this line too long or with low spots can lead to water building up and leaking out of the air gap of the faucet

### NOTICE

**DO NOT** overtighten fittings

### PARTS LIST FOR FAUCET

ITEM	DESCRIPTION
A	Escutcheon Plate & Rubber Washer
B	Slotted Metal Washer
C	Spacer
D	Lock Washer
E	Locking Nut
F	Plastic Insert
G	Sleeve
H	Compression Nut
I	1/4" Tube (Filtered Water)
